

Thermo Vista

Environmental Monitoring & Alert Systems

Divert Disaster Before it Strikes...

Anyone who has ever experienced a catastrophic computer room event knows that the investment in an environmental monitoring solution far outweighs the cost associated with interrupted business & dissatisfied customers.

Thermo Vista, a web based environmental & security monitoring solution protect your server room / data centre from disaster by providing early warning through **SMS / Email**.

Key Features...

- The software measures and stores temperature, humidity, wetness and door open at desired time intervals.
- Notifies appropriate personnel about the condition change through variety of alert modes: **PC display, email & SMS**.
- Measures temperatures from -40°F (-40°C) to $+140^{\circ}\text{F}$ ($+60^{\circ}\text{C}$).
- Reading in Celsius or Fahrenheit.
- NIST certified US made hardware.
