

# Thermo Vista

Environmental Monitoring & Alert Systems

*Give your customer direct*

*proof that goods are stored in right temperature...*

A warehouse measuring thousands of square meters is likely to exhibit differing temperature zones. Continuous temperature monitoring ensures that your goods are being stored in product specified conditions.

Our environmental monitoring solution "**Thermo Vista**" allows you to monitor the temperature and humidity level in your Warehouse at any time, from anywhere, using **email/SMS** alerts.

Due to accurate and consistent monitoring by Thermo Vista, your customers will have direct proof that their products are being stored as directed.

## Key Features...

- ❖ The software measures and stores temperature, humidity, wetness and door open at desired time intervals.
- ❖ Notifies appropriate personnel about the condition change through variety of alert modes: **PC display, email & SMS.**
- ❖ Measures temperatures from -40°F (-40°C) to +140°F (+60°C).
- ❖ Reading in Celsius or Fahrenheit.
- ❖ NIST certified US made hardwares.
